

MPC4000 V1.10 Operating System Upgrade

This is to announce the release of V1.10 operating system for the MPC4000. The main purpose of the update is to add the following improvements:

[Improvements/Additions:]

1. Quick-FX Resampling supported
2. Renaming folders supported
3. CONVERT to SEQ function in Song mode supported
4. APS file for MPC2000/XL is now supported
5. CD Player function from internal CD drive is now available - see notes.

Note 1: When an Audio CD is mounted on the internal CD drive (requires internal connection of either analog or digital output), the audio signal can be sampled in Record mode.

Note 2: When the Internal Drive is selected as the recording source in Record mode, the function keys, e.g. PLAY, STOP, etc., become available on the screen.

6. Disk Eject key [F3] has been added to Load and Record (CD Player) screens for easier access to the disk eject function.
7. OS update from removable media is now available.

[Corrections]

1. After the folder that contains SMF with Program Change is loaded using Clear Load function, it may result in "Fatal Error" when played in Main screen - *fixed*.
2. The system may lock up when larger than maximum sequence data is created - *fixed*.

[Note]

1. No operator's manual addendum has been issued on this update.

For information on how to obtain the upgrade, check the Akai web site at <http://www.akaipro.com>, or contact your authorized Akai distributor.
