

Release date: July10, 2002
Ref. No.: MPC4KV120

MPC4000 V1.20 Operating System Upgrade

This is to announce the release of V1.20 operating system for the MPC4000. The main purpose of the update is to add the following improvements:

[Improvements/Additions:]

1. E-Mu EIII CD-ROM libraries supported.
2. MPC3000 disks supported.
3. Sample Start modulation supported in the Program Modulation page.
4. Zone Select Modulation supported in the Program Modulation page.
5. In the Program mode, Key Groups can be selected automatically when pressing "Shift+Goto" and playing the desired notes.
6. In the Program mode, it's now possible to set "Keygroup Edit: ALL" for "Type = DRUM" programs.
7. "Step edit monitor: ON/OFF" setting available in MISC mode. Allows the user to enable/disable automatic playback of events when scrolling through the event list in STEP EDIT mode.
8. "Note repeat/Erase: Latch/Unlatch" function added in the Misc. page.
9. The TAP TEMPO key can now be used as a "Space" character when renaming.
10. "Sync ON/OFF" setting added in the Song page, and now allows users to set a "Sequence start time" separately from the Sequence setting in the MAIN page.
***Note:** "Sync ON/OFF" setting deleted from Misc. page.*
11. All playback sounds are stopped by triple pressing the Stop button.

[Corrections]

1. Tracks muted in "Track Mute" will retain their "Mute" setting in the Main page.
2. Playback of all sounds may be stopped by a Sustain Pedal OFF message, even if the note is being kept on. — > fixed.
3. "Sequence start time" doesn't work in the Song page. — > fixed.
4. It's now possible to select a sample in the Program page by playing a pad, and this will be the selected sample in the Sample page.

5. MPC2000 proprietary CD-ROM format (not ISO9660 format) supported.
6. Disk save speed improved.
7. USB Host driver improved to support more drives. (USB MO drive, USB HD drive, USB Flash memory, etc.).
8. Display modes are being kept when switching to another page.
9. Playback button (F3[>Effect], F4[>Origin]) added in the Q-FX page.
10. "Un-Solo" function in the "Track mute" supported.
11. Other minor bugs fixed.

[Notes]

1. MPC4000/Z4/Z8 with an OS earlier than V1.20 can not load program data created by MPC4000/Z4/Z8 with V1.20 or later.
