

MPC4000 V1.16 Operating System Upgrade

This is to announce the release of V1.16 operating system for the MPC4000. The main purpose of the update is to add the following improvements:

[Improvements/Additions:]

1. The ak.Sys V2.3 official version now supported.

Note: *ak.Sys V2.3 should be released within 1 week*

2. Inhibit using files using the same file name, thus the file with the same name will be renamed automatically.
3. Allows the Part assigned to a Track in the main screen to be changed while playing back or recording.
4. Allows saving the Pad sensitivity to the Flash ROM.
5. Allows the user to insert Bars before Bar 0 in the Edit Bars page.

[Corrections]

1. In the MTC slave mode, the Song may not playback correctly, if the sequence contains Tempo Change - *fixed*.

[Note]

No operator's manual addendum has been issued on this update.

For information on how to obtain the upgrade, check the Akai web site at <http://www.akaipro.com>, or contact your authorized Akai distributor.
