

## Update procedure

---

### How to copy OS bin file to CF with MPC1000 and Computer

Required Equipment: Compact Flash (CF), USB mass storage class supported computer (Windows XP/ME/2000 or Mac OSX, OS9.x)

- Download the MPC1000 OS from our website to your computer
- Your browser should automatically unzip the file and you should have a file called MPC1000.BIN on your computer
- Insert Compact Flash into MPC1000
- Switch the MPC1000 on
- Go Load mode, then press USB (F4)
- Connect a USB cable between PC to MPC1000 (display will change from 'Status=Not Connected' to 'Status=Connected')
- PC will mount the CF card of the MPC1000 as a drive on your computer
- Copy (drag) OS .bin file on to the CF
- Once the file has been copied, disconnect the USB cable

### How to update MPC1000

- Insert CF with OS data into MPC1000
- Turn the power on while pressing down the WiINDOW button
- Press the REC button- the MPC1000 will start processing the update and will then re-boot automatically with the new OS

\*\*\*\*\* IMPORTANT NOTE \*\*\*\*\*

**DO NOT SWITCH THE MPC1000 OFF WHILST IT IS UPDATING THE OS**
